#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 07/02/. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 8-9, 12, 15-16 and 19 rejected under 35 U.S.C. 102(e) as being anticipated by Rodriguez et al. (6,435,013).

With respect to claims 8 and 15, Rodriguez et al. disclose a ferromagnetic particles sensor (see e.g. fig.1) and capture magnet (see e.g. col. 1, lines 41-45) for detecting accumulation of the ferritic wear particles in engine oil and using an output signal of the sensor as an indication of a condition of the machine (see e.g. col. 1, lines 15-24).

With respect to claims 9 and 16, Rodriguez et al. disclose the invention as claimed including the sensor built into the oil duct of the machine (see e.g. col. 2, lines 39-44), and arranging a capturing magnet in the lower region of the oil duct with the reed contact located opposite in an upper region of the oil duct (see e.g. Fig.1 and col. 1, lines 41-45, col.2, lines 45-62).

With respect to claims 12 and 19, Rodriguez et al. disclose the invention as claimed including one of a permanent magnet and an electromagnet as a capturing magnet (see e.g. Fig.2).

4. Claims 10-11, 13-14, 17-18, 20-22 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

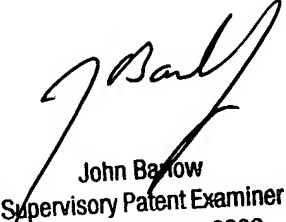

5. Claim 23 allowed.
